

We provided data for two users in the same setting as described below. During testing on demo day, mic array configuration is the same. The only things that will be changed are user location and mic array location.

Mic array location:

1	3.5000	1.5000
2	5.5000	0
3	0.5000	3
4	1	0
5	2	2
6	0	0
7	4.5000	3.5000
8	4.5000	0

Mic array shape & size:

Mics are at the position of the red dots and six mics form a hexagon array.

Mic #2 facing +x, Mic #1 60 degree counter-clockwise from #2 and so on...

Mic distance:0.09218 m

8 csv files for each user represent data received at 8 mic arrays, each csv has 6 columns

Sample rate: 16000Hz

User location: (3, 1)

Configuration Overview:
